I think that allowing Microsoft to push it's monopoly into schools as punishment for it's monopoly is down right stupid. This company get away with murder and needs to be punished fully. I think the original ruling to break up the company allow companies with actually working products to flood the market. Please do not allow Old bill to rule my Microwave, Video games, Computer, TV, Internet, Car, and even bed. They are taking it too far and should stick to making an OS and office suite.
